

The Orbital® CX-2000 Programmable Coaxial Cable Stripper

The Orbital® CX-2000 is a fully programmable coaxial cable stripper using Orbital's exclusive orbiting blade technology. It is designed to strip coaxial and triaxial cables up to .275" O.D. (7mm) with strip lengths up to 1.500" (38mm). All strip parameters including strip length, strip depth, dwell time etc... are fully programmable. Large Graphical User Interface (GUI) allows all cable setup data to be displayed and edited simultaneously - no "paging" through multiple menu's. Memory storage for as many as 999 cable programs. Interchangeable wire guides and infinitely adjustable wire guide centering assures superior strip quality. Programmable wire clamp pressure allows the amount of force used to hold the cable during processing to be adjusted for different types of cable. Titanium Nitride (TiN) coated HSS cutter blade for long life.

Note: Specifications are subject to change without notice.

- Exclusive orbiting blade technology
- Cable diameters to .275" (7mm) maximum
- Strip length to 1.500" (38mm) maximum
- User friendly GUI with large LCD display
- Extremely user-friendly programming
- All strip parameters fully programmable
- Program up to 5 steps for coax and triax cable
- Inches or millimeters user selectable
- Programmable password for security
- Batch counter with audible alert
- Two independent, resettable total counters
- Memory storage for 999 cable programs
- Typical 3-step strip in 7 - 10 seconds
- Interchangeable wire guides
- Built-in wire guide storage
- Precisely adjustable cable centering
- Programmable cable clamping pressure
- Universal 85 - 264 VAC power input 
- Designed and manufactured in USA
- One year warranty (excludes wear items)
